PROFESSIONAL SUMMARY

B.Tech Artificial Intelligence and Data Science student focused on Unity-based VR simulations, XR module delivery, and immersive training workflows. Developing a Meta Quest 3 venipuncture training simulation using Unity, C#, and BNG Framework, alongside an XR module management platform using React, TypeScript, Electron, Unity Addressables, and AWS S3. Additional experience includes AI-powered applications, full-stack development, API integration, and automation. Seeking AR/VR Developer, Unity XR Developer, or VR Simulation Developer opportunities.

TECHNICAL SKILLS

AR/VR & Game Dev: Unity, C#, Meta Quest 3, BNG Framework, XR Interaction Workflows, VR Simulation, Unity UI Toolkit (UXML/USS), Unity Addressables

Programming Languages: Python, C++, C#, JavaScript, TypeScript

Frontend & Mobile: React, React Native, Expo, HTML5, CSS3, Tailwind CSS, Responsive UI, Component-Based Development

Backend & APIs: Node.js, Express.js, FastAPI, Flask, REST APIs, API Integration

AI & Generative AI: Gemini API, OpenAI API, MCP, Prompt Engineering, Whisper STT, Kokoro TTS, Generative AI

Databases & Cloud: MongoDB, MySQL, Firebase, Supabase, AWS S3

Tools & Practices: Git, GitHub, VS Code, Postman, Docker, Vercel, Render, Netlify, Electron, Debugging, Testing, Agile/Scrum

AR/VR PROJECTS

Venipuncture VR Medical Simulation

Unity 6, C#, Meta Quest 3, BNG Framework

- Developing a VR training module around a fixed 16-step venipuncture procedure, from handwashing and glove use through blood collection and safe disposal.
- Implementing interactive procedure components for handwashing, glove interaction, object movement and placement checks, disposal validation, and blood-collection visualization.
- Designed Training and Test modes: Training provides immediate guidance, while Test mode records mistakes for feedback at the end of the session.
- Planned an offline voice-assistant architecture using Whisper STT, procedural intent routing, medical knowledge retrieval, and Kokoro TTS. Unity and the voice pipeline are not yet integrated.

XARC Nexus — XR Module Management Platform

React, TypeScript, Electron, Unity, AWS S3, Git

- Developed a desktop application to manage and launch Unity-based XR training modules, including downloading, launching, tracking, and updating module content.
- Integrated Unity Addressables with AWS S3 for remote asset delivery and version-based content management.
- Built modular content-delivery and synchronization workflows, using Git and Agile/Scrum practices during development.

PROFESSIONAL EXPERIENCE

AI Intern — Chargebee

Feb 2026 – Present

- Developing AI-powered internal tools and automation workflows using modern web technologies, backend services, and AI integrations.
- Building features with React, JavaScript/TypeScript, and APIs; collaborating with engineering teams on implementation, debugging, testing, and iterative development.
- Working with Git-based development workflows and contributing to production-oriented software solutions.

Web Development Intern — Femtosoft Technologies Jul 2025 – Aug 2025

- Developed responsive full-stack web applications using Python, React, and REST APIs.
- Integrated frontend interfaces with backend services and collaborated with developers to implement features and resolve issues.
- Strengthened practical skills in frontend development, API integration, debugging, and software development workflows.

ADDITIONAL PROJECTS

Skill Ascend — AI-Powered Career Mentorship Platform

React, TypeScript, Node.js, Express.js, Gemini API, D3.js, Tailwind CSS

- Built a full-stack platform that analyzes skills and target roles to generate personalized learning roadmaps and career recommendations.
- Developed reusable React/TypeScript interfaces for assessments, roadmaps, project suggestions, and interview workflows; used D3.js for interactive progress visualizations.
- Integrated backend APIs and Gemini AI for career guidance, role-specific mock interview questions, project recommendations, and progress tracking.

GitHub: github.com/Magesh-03-K/Skill-Ascend- | Deployed: skill-ascend-rahb.onrender.com

Magesh AI MCP — Learning Path Generator

Python, Streamlit, MCP, Google AI Studio API, Pipedream, YouTube/Drive/Notion APIs

- Built a Streamlit application that generates goal-based learning paths and connects learning resources with YouTube, Google Drive, and Notion.
- Implemented progress tracking and modular app components, with external service connections routed through Pipedream.

GitHub: github.com/Magesh-03-K/Magesh_AI_MCP

AI-Powered Resume Builder

React, Python, Chart.js

- Built an AI-assisted resume generation platform focused on ATS-friendly content, with interactive frontend workflows and dashboard visualizations.
- Integrated AI-assisted content generation into a user-friendly application workflow.

Space Escape Runner — Cross-Platform Mobile Game

React Native, Expo, TypeScript, Reanimated, Gesture Handler

- Built a cross-platform game with gesture-based spaceship movement, a real-time game loop, collision detection, scoring, game-over and restart flows, and high-score tracking.
- Organized gameplay logic into reusable components and custom hooks, and debugged interaction issues during Expo development.

GitHub: github.com/Magesh-03-K/SpaceEscapeRunner

EDUCATION

B.Tech — Artificial Intelligence and Data Science

Prathyusha Engineering College | Sep 2023 – Present | CGPA: 8.94 / 10

Higher Secondary — Computer Science with Mathematics

Dr. VGN Matric Hr. Sec. School | 2022 – 2023 | 95.50%

CERTIFICATIONS

- NPTEL — The Joy of Computing Using Python (Jul–Oct 2024), Silver + Elite status, 82%
- NPTEL — Introduction to Machine Learning (Feb–Apr 2025)
- NxtWave CCBP 4.0 Academy — Build Your Own Responsive Website (2024)

ACHIEVEMENTS

- Participated in 2+ national-level hackathons
- Top 10 finalist, college-level hackathon
- 1st place, technical quiz
- Solved 50+ programming problems (Python, C++)
